EVENTS

projects & concepts

Our catalog consists of four distinct projects, each one in coherence with our artistic line. They are distinguished by their own identity and offer the public a diversity of experiences around electronic music.

Each of these projects embodies a unique way of experiencing music: immersive, festive, contemplative or experimental

By combining artistic requirements, accessibility and local roots, our catalogue fully reflects our commitment to a lively, inclusive and constantly evolving electronic culture.

The idea is simple: to discover electronic music differently, through unique moments, thought with care and passion.
